<b>Material</b>	:	100% Natural
<b>Color</b>	:	Light Yellow
<b>Grade</b>	:	Bombay Grade, Kolkata Grade & Mixed Grade
<b>Packing</b>	:	50 Jute Bag
<b>Type</b>	:	DRY
<b>PAYMENT TERM</b>	:	T/T 30%deposit / 70%balance

### **Damar Batu: A versatile natural resin.**

Damar Batu is a natural resin which comes from prehistoric Shorean trees growing in the forests of Southeast Asia. Also known as stone resin, black resin or cat's eye. Because of its hard, strong structure it can be used in many fields.

Damar Batu: It has many applications. A natural resin. Damar Batu originates in the ancient Shorean tree, found on forests across Southeast Asia. It is also stone resin, or black resin; it's the cat's eye. A: Because the structure of Damar Batu is hard and sturdy, it can be used as investment capital in diverse areas at different locations.

Damar Batu are everywhere beneath the ground. There they harden into fossilized pools of resin. However, color and size also vary: from yellowish-brown to black. In addition quality and structure are determined by the species of Shorean grown; climate conditions there as well as soil

Damar Batu can also be found in the traditional and modern industries. Some of the common uses are:

- Incense: Damar Batu is burned to fill the air with an agreeable scent, and can also cover up a death or decaying stench. It is also employed in religious ceremonies and rituals.
- Medicine: Damar Batu has served as a medicine to treat wounds, resist infection and prevent inflammation or acute pain. It also can be used to treat fevers or skin diseases. It's also an anti-inflammatory, antibacterial antifungal and analgesic.
- Varnish: Damar batu is an ingredient in paints and varnishes. It enhances the hardness, polish and water resistance of wood surfaces. It can also protect wood from termites and fungus.
- Paper: Damar Batu makes good filler or binder for paper making. It toughens, softens and colors paper.
- Wood: Damar Batu is a wood conditioner or preservative. It protects wood against water damage, insect attack, fungi and decay.
- Polishes: Damar Batu is a metal surface polishing agent. It can make metal smoother and shinier.
- Inks: Damar Batu is used as an ink for writing or printing. It can create brilliant colors and long-lasting effects.
- Beverages: Damar Batu is added to beverages as a flavor enhancer.

Damar Batu is good for people as well as nature. Some of the benefits are:

- Eco-friendly: Damar Batu requires little energy or chemicals in its production, and is therefore a replenishable resource. It doesn't pollute when burned or used.
- Biodegradable: Damar Batu degrades naturally without any left over or pollution.
- Renewable: Damar Batu can be replenished by planting new trees and cutting old ones.

Damar Batu is a very interesting natural resin that has wide applications. But its environmental friendliness is also friendly to both humans and nature.
